PROSPECTUS OF THE Malue Farmer and Mechanics' Advocate.

(NEW SERIES.) E. HOLMES, Editor. cordance with the suggestions of their friends, and with a view in meet the wishes of a large number of their subscribers, have come to the conclusion to make a change in the form and size of the paper, on the first of January next. It will be about double the size that it now is.

They propose to issue a paper, once per week, in alarge folio size, to be called MAINE FARMER AND starge 10110 SIZE, to be carried MAINE FARMER AND MECHANIC'S ADVOCATE. One page is to be devoted erclusively to Agriculture one to Mechanical subject, frequently illustrated with engravings one page to the current news of the day, with the pro-reedings of the Legislature and of Congress when these two bodies are in session and the remaining page to be devoted to miscellaneous reading, poetry, alvertisements, &c.

They presume it is not necessary to enlarge upon the peculiar character or future course of the paper now offered to you. The Maine Farmer has been peristence nine years, steadily and perseveringly denoted to the interest of the productive classes. It will continue, as bitherto, a steady and undeviating inend to the Farmers and Mechanics; zealously urg neigrand the spirit of improvement, and encourtel practical Farmers have long been engaged in columbs of the Farmer. These awell as others will continue their aid and assistance in the Agricultural portion, and we have the assurance of many excellent Mechanics that they will also contrib-ute to the columns of their depart-

PERSONAL REAUTY CONSIDERED IN PERSONAL REAUTY CONSIDERED IN CONNECTION WITH DOCT. FELIX GOU-

The sculptur whose study is to imitate the exquisite workmanship of nature, pourtrays in his model of the human form a broad and elevated forehead. This developement is not only consonant with, but sometimes necessary to the posses sion of a high order of mental faculty. It same forehead is a mark of intellect, it is no less an es sential element of personal beauty, and it is of importance to those, and there are many such. possessed of this prominent feature, though ob scured by the encroachments of a too luxurious growth of hair, to remove that portion of an ex crescence which tends, in their case Unty to deform. This can be done safely speedily, effectually, and, if used in accordance with directions, without the least inconvenieuge, by Dr. Fithx Gourauit's De pilatory Powders. The fuize of the lip, when an noving, or the short fiair on the back of a ladies? neck, when too apparent the hair of a mole, or the heard, when hig upon the check, may alt he removed, and eventually the roots destroyed, by the use of this preparation.

ION S. BAYWARN, BURNI

SATURDAY, FEB. 12, 1842,

Weekly Su -ry.

We had a snow storm at the commencemen of the week, and business for two or three days was very active in consequence. The aleighing is now pretty much worn out, and at the time of writing, there are some inductions of rain. Our Washingtonian friends have had frequent my cames during the week to complete their arrangements for their temperance festival on the red inst. They have invited delegates from all the Washingtonian societies in the county to meet them, in the convention for the purpose of form-19g a county society, and for toking such measures as shall secure success to their great and hely enterprise They have made arrangements to give a free dinner to all the delegates that may attend. The day will be a proud one for our city, and for the cause of Washington Temperance principles, and it is to be hoped that every society in the county will be fully represented on the occasion. There is some little jarring among a few members of the society upon a collateral subject which we hope to see speedily healed that no bone of contention may divert them from the benign object of purifying society of Mat same to human nappiness intemperance. The Lyceum was thronged ou Tuesday evening, to listen to a lecture by President Woods -It as acknowledged on all hands to have been a splendid performance surpassing rich in style and full of deep learning. The almost breathless attention of the audience was an eloquent terbute to the masterly power of the orator. While there was an evident attachment to the works and worship of the past a deep veneration for the ancient fathers and their old customs and opinions, there was also so much liberality and independence so much frankness in estimating the value of our times with others; which could approve the good of the olden time, and condemn the evil of the present, which could speak to living men, and yankees too, without glorifying their institutions, their opinmere, and all their works, that to us it was truly refreshing. We have, it is trace, become so familiar with horsting and self-glorification of our own age as the truly golden age of the world, that the President did at times almost seem to he throwing us a little too far back into the shade to suit the gennine yankee feeling. As a people too, we have too strong a prejudice against the Romish church to feel quite easy when it is suggested that we judge the ancient church unjustly, and that the great conflicts in human society will probably become calmed by a union of the Catholic fiith with protestant learning But we are not sure that we understood the whole of the lecture. We cannot think that society will ever again be at peace under the force of authority. We would give much to hear the lecture again; to correct our impressions, as many of our friends differ from us as to several of its doctrines. The District Court still continues in resion here, although we learn that the juries have been discharged, and the court will riswith the close of the week. The week has been a moderate and a quiet one. Very little of special interest has transpired worthy of particular

The Washingtonians in East Guilford, have swept the boards. The beer and cider drinkers were not_forgetten, and he exhibited to the audience the quantity of pure alcehol contained in a pent of cider, and tested its quality by dipping a strip of paper into it and then applying it to the gas light, thus producing, as he humorously remarked, him he also subjected that taken from the dead of her delightful "Melodies," your taste would be much improved, as well as your rhyme and measure. Wishing you all manner received the beer to the same test and with the same effect. The amount of alcohol contained in a half pint of beer is about the same as that contained in a pint of order, being about one half of a common wine glass full The sediment of the beer and eider was also exhibited, and submitted to the test of the audience. This was about equal in quantity to the alcohol, and was of masogony eolor' I wish every beer and cider drinker in the land had been present. We learn from one of the short miscellanies, that the tex plant is successfully cultivated on a large scale in the Island of Madeira, at an elevation of 3000 feet above the sea, by Mr. Henry Veitch, British Ex-Consult The quality of the leaf is excellent; the whole theory of preparing it is merely to destroy the herbaceous taste, the leases being porfect, when, like hay, they emit an agreable odor. But to roll up each leaf as in China, is found too expensive; although

boys and girls re employed at five cents per day This difficulty is represented as an insuperable obstacle to the successful competition of the new tea plentations in Assum (British India) with the still cheaper labor of China. The enpressing the tea leaves into small cakes, which can be done at a trifling expense, so as to enable has to expect to England immense quantities, at lower prices than he could import it from China. Compression would have one important advantage over rolling the leaves. It is performed when the leaf is dry, whereas, the rolling requires moisture, and subsequent rossting on copper plates is necessary to prevent-mustiness. In this process the acid of the tea acts upon the copper, and causes the astringency which we remark in all the China teas | The plea frangrane, the flower of which is used to scent the teas, espossally the black, grows luxuriantly in Madeira

Nothing farther had been heard from the ex pedition, and scarce any thing of moment had occurred at Canton or in its vicinity. The most important item of intelligence, perhaps, is the official notification from Pekin-that Keshen was to lose his head, contradicting previous accounts that he had again been taken into favor. This is supposed to show the hostile intents of the Emperor.

AND CHINESE BLOOD PILLS.

The Greatest Secret Discovered Lan TURGE purge purge has been the cry for the and why? Not because purging was not necessary, but too much has been done without the tonic to follow, and sustain the system. Purge, you must! The sickly humans of the blood must be carried off or the accumulation of them prevented. Prevent,

then, the growth of such humous.

Why do the Chinese live to such immense ages, and still retain the powers of youth or middle age Because they purify the blood. The Chinese BLOOD Pills so called because they work upon and cleanse the blood are the standard remedy.
